

Rotokawa School

Hi Sonja
Thanks for all of your work. This looks great and reads well for us. Love the photos in there too. I appreciate the work you have done.

Who's Ya Barber ?

I have been working with the team at Findus for just over a year. Not only has my clientele increased but the customer feedback on the FindUs Loyalty App has been invaluable.

Our loyalty programme runs on a card file system but when you have approx 1000 cards in there it takes quite a while for the guys to find their card. Since starting the loyalty app more than half of these cards are now on our clients phones and the love it! Plus saving my team heaps of time. We also promote other local businesses that are using the FindUs App.

My Google rankings have increased from page three to page one in a very short time, all thanks to this little wee app linking to our online advert. The staff at Findus have been wonderful always trying to make things easier and coming up with great ideas ...

I look forward to continue working alongside the " FINDUS " team

Leigh Basinger Artist

Findus built my web page to promote my business. They were quick and efficient and made excellent suggestions on how my page should be presented. "Findus" staff have been a pleasure to work with. They have a "Can Do" attitude and for someone that is not a computer expert (like myself) they made things so easy for me to manage on my own.

I can edit my web page at any time without having the expense of engaging a computer expert to make any changes or additions. If I'm in doubt with any matter with my web page "Findus" are on call and are very approachable with all queries. I found them very professional and efficient.

As a result of marketing and advertising with Findus my business has been very successful. Enquiries have increased enormously as well as sales.. I can highly recommend the excellent services of "Findus"

Roger That Handyman Services

Roger That Handyman Services recently underwent a re-branding exercise and as FindUs has always produced my business cards and flyers so they were the logical choice to use for internet advertising. I have my website with FindUs and am being found on the first page of google under a number of search words - Roger That is even getting found ahead of national franchises who have a large marketing budget.

I have been approached (hounded) by directories, internet, and google experts who promised the earth and wanted to charge the moonbeams for their services and don't understand the word "NO".

Go with FindUs - they are affordable, easy to deal with and explain things in plain English. Thanks heaps.

Ravenswood Manor

My partner and I have purchased Ravenswood Manor a boutique B&B accommodation homestead overlooking the bush and gentle inlet of Lake Karapiro. The team at FindUs offered to put a website page together before we even moved in there, and within a 24 hour turn around time we were live on google.

It took 2 days to get our first booking! All our friends and colleagues were impressed by the website knowing we were yet to move in! In just over a month we have had over 800 hits, and being in the middle of the "Karapiro" wedding zone we are pretty excited.

All we needed to provide were some key words and pricings, and existing photos were scanned in. A total of half an hours work our end and FindUs did the rest. We can't wait to tweak our photos and further titivate our site. We cannot thank FindUs enough for what they have recommended and offered to do to support our new business.
